Citizen eco-drive promaster diver manual pdf file

once every two seconds. Page 41 Model No. Cal.B620 CTZ-B8176... Precautionary items and restrictions of use Care for your watch* Clean any dirt or moisture such as sweating from the case and crystal with a soft cloth. Table of Contents Component identification ..7 Eco-Drive (solar power) watch handling precautions ..22 Charging the watch8 Water resistance ...26 Setting the time ...12 Precautionary items and calendar adjustment ...14 Limitations of use ...29 Using the chronograph ...16 Specifications Be sure to rinse the band thoroughly after cleaning to remove any soap residue. AcAcA The durability of a leather band can be affected when wet (discoloration, peeling of the adhesive), due to the properties of the material. The following table provides examples of usage as a reference to ensure that the clock is used correctly. ... While the second hand moves once every two seconds (the function of insufficient charge warning, see page 9), it is not possible to use the chronograph. When the clock is sufficiently loaded, the second hand will move normally. Every time you press the button, 1/5 hand chronograph moves 1 step each. Thank you for purchasing this Citizen watch. Page 31 Water Resistance AcAcA The non-water resistant models are not designed to come into contact with any moisture. However, the energy consumption can increase after the use of the watch for a number of years due to the wear of the internal components and the deterioration of the oils. It can cause malfunctions and/or deterioration of performance, as well as damage to the case and bracelet. If the adjustment is not done properly, the bracelet may come off unexpectedly resulting in loss of the watch or injury. If you don't wind the clock for eight Or more after the insufficient charge warning movement has started, the watch will be sold out of all the power and stops. Make sure to fully load the clock. Press the key ... (the unit is $\text{A} \text{ } \text{C} \text{ } \text{A} \text{ } \text{C}$ bar'a $\text{A} \text{ } \text{C} \text{ } \text{A}$ is approximately equal to 1 atmosphere.) $\text{A} \text{ } \text{C} \text{ } \text{A} \text{ } \text{C}$ Water resist (ant) è supplies— Bar can be able to be referred to as W. Page 37 Precautionary Articles and Limitations of Use CAUTION Always keep the clock clean*Ac Rotate the crown while pressed completely and press the buttons periodically so that they do not lock due to accumulations of foreign matter. Hands stop. The illustrations in this instruction manual may differ from the actual appearance of the clock. Ac Even if the clock has a high level of water resistance, please pay attention to the following. Ac For the metal, plastic or synthetic rubber (polyurethane) band, clean it with soap and a soft toothbrush. A—Ac The pivot of the Ac projecting band. Corrosion of the accumulated metal or foreign substance may result in the release of black residues from the bracelet if exposed to moisture or sweating. A Current time is shown while the chronograph is working. Contact your nearest Authorized Service Center. Discoloration and early aging may occur. A Ac If water enters the clock or the clock radiates and does not clear even after a long time, consult your dealer or authorized service center for inspection and/or repair. Page 40 Specifications A Ac Solar power function Extra A Ac Boost Prevention function * Ac Poor boost warning function (movement at two-second intervals) A Ac Quick start function A Ac Chronograph (up to 60 minutes in 0.2 second increments) AcSecond hand chronograph reference position correction function Specifications and contents of this leaflet are subject to change without notice. Symptoms Remedies Page The movement of a band seems strange The hand of the second hand moves from 8 to 11 Fully load the clock. Do not press the crown or the buttons when the watch is wet. If you do not use the watch for a long period of time, carefully clean any sweating, dirt or moisture and store in an appropriate place, avoiding places subject to excessively high or low temperatures and high humidity etc. After reading the manual, keep it in a safe place for future reference. This can cause the stored energy to be depleted at a faster rate. For a leather ribbon, clean the dirt with a dry cloth. Protective stickers Make sure to remove any protective stickers that might be on the watch (case, strap, clasp, etc.).Otherwise, sweating or moisture may result in... With light pressure Rotate the crown towards the case, rotate the screw down counter-clockwise until it crowns clockwise to secure the release of the crown from the case. Ultraviolet light such as direct sunlight can cause discoloration or deformation. Rotate the crown to adjust the time. Precautionary items and restrictions of use WARNING Precautions Ac Always use the watch with the crown on (normal position). Ac Long sleeves can inhibit the transmission of light to the watch. Please use this table for reference only. Page 12 Loading the clock When the clock reaches a low charge state (insufficient charge warning function) When the power reserve drops, the seconds hand moves once every two seconds. The second hand doesn't move. For optimal performance, make sure A Ac Expose the clock direct sunlight for five or six hours at least once a month. If the screw type A crown, make sure it is tightly blocked. Page 16 Time adjustment Push the crown into position according to a reliable reliable source of time Finish the procedure. Otherwise the indication of the date can change improperly. Ac Develop the 24 -hour hand moves. Please note that the watch can work irregularly or not at all if exposed to intense static electricity. After removing the clock, put it in a place where the dial is exposed to intense light, for example by a window. Ac Develop when the time on the clock is between 21:00 and 1:00, do not perform the adjustment. Ac Develop when you remove the clock, put it in a luminous position to ensure optimal performance. Pay particular attention to the hand to ensure that the time an or prosecutor is set correctly. Problem resolution if you have a problem with the clock, check the table below. Before using this watch, unlock the crown/button, unlock the crown/button before using the clock. PAGE 35 Precautionary articles and limitations of use attention when wearing the watch (continues) is develop to request the adjustment or repair of the gang in the following cases: Ac Develop an anomaly with the Band due to corrosion. Push the crown in position to complete the procedure. Press and hold the button for two seconds. Ac Develop a leather band with substances containing volatile materials, bleach, alcohol (including cosmetics). Ac Develop the clock before going to bed. Page 30 resistance to water linked to water uses a minor exposure swimming and manage the crown in the water (washing the diving of the general washing skin, diving or underwater buttons when face, rain, etc.) works marine sport using a tank Air the watch is wet ... Ac Develop if the sea water enters the clock, put the clock in a box or a plastic bag and immediately take it for repair.
